

MK-III OC SPRAY (STREAM, FOAM, FOG)

EXTREME STOPPING POWER: When sprayed at the face, there is an inflammatory response of the eyes, nose and throat. Intense pain, temporary blindness, coughing, nose and throat irritation, and skin irritation incapacitates a violent subject for several minutes, allowing officers to gain control of the subject(s).

TARGET ACQUISITION: Spray unit includes technology that allows officers to deploy the unit from any angle, maximizing target acquisition.

INTENSE HEAT LEVEL: Red Storm Xtreme's OC formula delivers intense heat when deployed.

LONG RANGE: With a 10-12 foot spray range, Red Storm Xtreme, when sprayed in a circular motion towards the center of the face, allows officers to stay safe while gaining control of an aggressive and/or violent subject.

TRAINING: Inert stream, foam, and fog units available for training.
