Formula	2% Chlorobenzalmalononitrile (CS), inert accelerants
Spray Pattern	Gel stream
Range	Up to 15 ft.
Other	UV Dye, BOV 360

 **MADE IN USA**

**EXTREME STOPPING POWER** Immediate involuntary eye closure and disorientation incapacitates a violent subject upon contact.

**CLEAN UP** Shockingly effective Reflex Remove® decontaminant neutralizes Presidia Gel® and provides relief for chemical agent symptoms within 2 minutes, compared to 15 minutes for competing products. Clean up is easy and fast for both people and surfaces. LE in Ohio call it “pure gold.”

**NEW PROPRIETARY FORMULA** The product is NOT pepper spray, but rather an innovative, target-specific, sticky, and rapid onset reformulation of LE-trusted CS.

**STICKS TO TARGET** Presidia Gel® sticks to what it hits, preventing side splatter or collateral effect; thus, officers can isolate a subject in a group without affecting bystanders. Cannot be removed by subject and thrown back at the officer.

**NO CONTAMINATION** Non-atomizing and non-flammable. Can be safely deployed indoors, in a vehicle, or in a crowd without affecting innocent bystanders. Safe to use with Electronic Restraint Devices (ERDs).

**TRAINING** Certified instructor training available - see our website for details.
